CONTENTS

Volume 42 Number 1 January 1985

EDITORIAL

A new look for an old Journal, *A. D. Farr* 1

LEADING ARTICLE

Standards of scientific writing, *A. D. Farr* 2

STATEMENT OF EDITORIAL POLICY AND FULL INSTRUCTIONS TO AUTHORS 3–7

ORIGINAL ARTICLES

'Of making many books . . .', *C. H. Collins* 8–10

Variables affecting the enzyme-linked antiglobulin test when detecting and quantitating IgG red cell antibodies, *N. Postoway, S. J. Nance and G. Garratty* 11–19

Enzyme-linked antiglobulin test: variables affecting the test when measuring levels of red cell antigens, *L. Wilson, M. R. Wren and P. D. Issitt* 20–25

A 'free-floating' technique for re-processing paraffin sections for electron microscopy, *W. L. Yau, S. B. Or and H. K. Ngai* 26–29

Stabilisation of C3 in EDTA-plasma at pH 6·0, *E. Ingham, G. Gowland and K. F. Taylor* 30–34

Factors contributing to the current educational provision for medical laboratory scientific officers, *R. T. Jones* 35–39

The effects of exercise on platelet numbers and size, *R. C. Peatfield, M. J. Gawel, F. Clifford, D. L. Guthrie and T. C. Pearson* 40–43

False low antithrombin III results in renal disease, *A. H. Fisher* 44–47

A case for a high-throughput laboratory, *R. Singer* 48–52

Fixation of *Mycobacterium leprae* in unstained smears prior to shipment or storage: evaluation of formaldehyde using *Mycobacterium tuberculosis* as indicator of efficacy, *B. W. Allen* 53–55

Rubella antibody detection by a microplate haemolysis-in-gel technique, *G. F. Winter* 56–59

REVIEW ARTICLE

Natural killer cells, *I. Kimber* 60–77

ANNOTATION

Bacterial adherence, *D. C. Old* 78–85

SHORT COMMUNICATIONS

Solid-phase ABO blood grouping using saliva, *M. L. Beck, L. T. Sinor, J. M. Rachel and F. V. Plapp* 86–87

Use of enzymes in distinguishing anti-LW^a and anti-LW^{ab} from anti-D, *C. G. Lomas and P. Tippett* 88–89
Water-soluble vitamin deficiency in the elderly, *G. M. Addis and J. Runcie* 90–91
Indium 111 (^{111}I) as a label for endothelial cells and fibroblasts used as target cells in cytotoxicity tests, *A. D. Blann and C. M. Garner* 92–94
Qualitative detection of aqueous formaldehyde in samples for bacteriological culture, *P. A. Willson and G. G. Raymond* 95–96
Multiple publication, *International Committee of Medical Journal Editors* 97

THESIS SUMMARIES 98–99

LETTERS TO THE EDITOR 100–106

BOOK REVIEWS 107–112

Volume 42 Number 2 April 1985

LEADING ARTICLE
Changing patterns in the medical laboratory, *A. D. Farr* 113–114

ORIGINAL ARTICLES
Use of water-soluble polymers in the preparation of blood group diagnostic reagents, *L. R. Spence, A. Chung and B. P. L. Moore* 115–117
Estimation of paracetamol, *M. Sullivan and P. Kenny* 118–123
Glycyl-leucine dipeptidase activity in normal and leukaemic B and T lymphocytes, *G. J. C. Kelly, A. Karim, R. F. Murphy, J. M. Bridges and D. T. Elmore* 124–128
Assessment of fibrin monomer polymerisation using a microcomputer, *J. L. Francis* 129–133
The role of mean platelet volume and platelet distribution width in platelet counting, *S. J. Marr and G. Galea* 134–138
Analysis of bacterial species and antibiotic susceptibility patterns using a microcomputer: an outline of one year's experience, *P. F. Wheat, J. T. Magee, D. M. Harris and R. C. Spencer* 139–147
Interpretation of disc diffusion susceptibility tests: a comparison of methods, *J. P. Donnelly* 148–155
Microwave processing of dehydrated culture media, *M. E. Cowan and J. Allen* 156–160
Virus diagnosis: a novel use for the protein A-gold probe, *J. E. Beesley and M. P. Betts* 161–165

REVIEW ARTICLES
The role of iron in infection, *R. Barclay* 166–177
Immune complex assays and their limitations, *D. C. Kilpatrick and J. Weston* 178–185

ANNOTATIONS

The clinical significance of urinary tract infection: and some thoughts about the future, *R. N. Grüneberg* 186–189

Developments in the study of bacterial enterotoxins, *C. G. Gemmell* 190–193

SHORT COMMUNICATIONS

A solid-phase red cell adherence test for platelet cross-matching, *J. M. Rachel, L. T. Sinor, O. W. Tawfik, T. Summers, M. L. Beck, W. L. Bayer and F. V. Plapp* 194–195

Haemoglobin measurement and blood protein precipitation with automated cell counters, *P. D. Nicholls* 196–198

An anti-fucose agglutinin in the ova of *Dicentrarchus labrax*, *J. A. Topliss and D. J. Rogers* 199–200

THESIS SUMMARIES 201–204

BOOK REVIEWS 205–210

Volume 42 Number 3 July 1985

LEADING ARTICLE

Ion selective electrodes—a new technology? *D. C. Cowell and M. W. Jones* 211–212

ORIGINAL ARTICLES

Thionin: spectrometry and thin-layer chromatography in relation to biological staining, *R. T. Allison and H. A. Sanders* 213–220

Free triiodothyronine in serum in relation to thyroid function, *J. W. Tuttlebee* 221–225

The significance of marrow hypoplasia, *E. M. Spiers and D. O. Ho-Yen* 226–229

An automated assay for serum ferritin, *H. Harries, D. Shankland and R. Henley* 230–232

Stability of folic acid activity in serum, *C. E. Voogd, M. G. A. Blok-Scholten and E. C. Spalburg* 233–236

REVIEW ARTICLES

Acquired Immune Deficiency Syndrome (AIDS), *D. J. Jeffries* 237–244

Haemoglobinometry: a historical review, *A. G. W. Webb and D. I. Webb* 245–251

ANNOTATIONS

Sodium and potassium ion selective electrodes: a review of theory and calibration, *D. C. Cowell, D. M. Browning, S. Clarke, D. Kilshaw, J. Randell and R. Singer* 252–261

Platelet function tests: a critical review of methods, *C. E. Williams, M. B. P. Entwistle and P. E. Short* 262–274

Prevention of human cytomegalovirus infection, *A. S. Tyms* 275–282

SHORT COMMUNICATIONS

Histological demonstration of spirochaetes: a method of preparing control sections, *A. J. Chaplin, S. E. C. Jones and P. Kirkpatrick* 283–284

Improved assessment of haemoglobin and red cell indices in blood samples with high white cell counts, *D. A. Francis, J. L. Francis and O. S. Roth* 285–286

Biotyping of *Escherichia coli* by a multiple inoculation agar technique, *K. W. Yap and A. P. Barton* 287–288

Storage of bacteria at −76°C, *D. J. White and R. L. Sands* 289–290

Rapid detection of group A streptococci on throat swabs, *D. N. Petts and G. A. Mantell* 291–292

THESIS SUMMARIES 293–297

LETTERS TO THE EDITOR 298–300

BOOK REVIEWS 301–306

Volume 42 Number 4 October 1985

LEADING ARTICLE

Molecular cloning of genes for blood coagulation factors, *J. C. Giddings* 307–309

ORIGINAL ARTICLES

Bioluminescence in the continuous flow analysis of creatinine using immobilised creatinine amidohydrolase, *J. S. Collis, J. M. Wright and R. F. A. Ginman* 310–317

Effect of beta-propiolactone on routine biochemical investigations, *B. J. Dooley, N. P. Harling, G. Lloyd and C. van Heyningen* 318–321

Rapid identification of *Clostridium perfringens* by counter-immunoelectrophoresis, *M. G. Holliday* 322–325

REVIEW ARTICLES

Diagnosis of inherited metabolic disorders by DNA analysis, *F. Güttler* 326–332

Biosensors in clinical biochemistry, *P. Vadgama and G. Davis* 333–345

The Interferons, *J. P. Walsh* 346–351

DNA probes for microbial diagnosis, *P. E. Highfield and G. Dougan* 352–360

Monoclonal antibodies in blood group serology, *S. F. Parsons* 361–366

Physiological effects of perfluorocarbon blood substitutes, *K. C. Lowe and A. D. Bollands* 367–375

The potential of synthetic peptides for vaccines, *M. W. Steward and C. R. Howard* 376–387

ANNOTATIONS

Recombinant DNA techniques in the pharmaceutical industry, *M. D. Winther* 388–392

Molecular biology, the new genetics and vaccine development, *G. Dougan and P. Highfield* 393–398

Studies of virus-infected cells by nuclear magnetic resonance, *P. E. Valensin and G. Valensin* 399–403

SHORT COMMUNICATION

Platelet aggregation in the presence of extracts of British marine algae, *R. A. Deacon-Smith, J. P. Lee-Potter and D. J. Rogers* 404–405

LETTERS TO THE EDITOR 406–408

BOOK REVIEWS 409–416

SUBJECT AND AUTHOR INDEX 417–423
